07 COMMON CLINICAL RECORDS FOR PRIOR AUTHORIZATION

Check when attached / reviewed. Items depend on indication and plan. Record N/A or gaps below.

- [ ] ALS specialist / neurologist assessment and diagnostic evidence supporting definite or probable ALS.
- [ ] Baseline ALSFRS-R with dated item scores; respiratory / ventilatory status and requested supporting tests.
- [ ] Clinical history and prior / current ALS treatments with dates, response and tolerance.
- [ ] Exact formulation and route; prescribed cycle, last treatment dates and administration needs.
- [ ] Renewal: clinical benefit, functional / respiratory status and continuing plan; verify route-specific policy.

08 AUTHORIZATION AND PAYMENT REVIEW - ADARA / BILLING TEAM

- [ ] Eligibility and benefits verified for the service date; correct medical vs pharmacy benefit, network and site of care.
- [ ] Current plan policy and preferred product checked; required specialty supplier / sourcing and exception approvals confirmed.
- [ ] Written authorization matches product, route, dose, frequency, units, dates and rendering / billing provider identifiers.
- [ ] Contracted payment terms, drug acquisition cost, nursing / supplies and patient responsibility reviewed; assistance eligibility verified.
- [ ] Claim preparation: validate diagnosis, product-specific HCPCS / NDC, unit conversion, service codes and applicable modifiers.
- [ ] Retain signed orders, delivery / administration records and wastage details; apply JW/JZ only when required; track renewal and filing dates.

Payer / plan / policy version / verification date

Authorization number / payer reference

Authorization valid from / through

Approved units / visits / frequency

Reviewer / date verified

Outstanding items / N/A rationale / reviewer and date

Prior authorization does not guarantee payment. Verify the member-specific policy before each submission.
Examples informed by payer guidance; not universal criteria or a complete safety checklist. Reviewed 2026-10-17.
